Title: Review supply chain resilience and research prospect

Language: Chinese

Time & Venue: 2023.03.16 15:10-16:10 南楼N212

Abstract:

In this paper, we review the different dimensions of supply chain resilience and propose that supply chain resilience should be measured in a more integrated way. We review the quantitative economic models that are used to conduct disaster impact analysis and also strategies that are adopted to strengthen supply chain resilience.
