Noël Hutchings & William D. Rumsey, Editors

The Collaborative Bibliography of Women in Philosophy is the print version of a continuing project in collaborative, online scholarship. The editors present a comprehensive work covering the entire spectrum of philosophical work produced by more than 3,500 women, from pre-Socratics to the present day. The bibliography contains over 11,000 citations, as well as a subject index, an index of named persons, and a list of over 100 contributors. Updates and additions to this bibliography will be made on a regular basis, and can be accessed through the project's [web site](#).
