IAENG 1 科学和工程国际大会 2007 年 3 月

The IAENG International Conference on Scientific Computing (ICSC'07) will take place in Hong Kong, 10-13 March, 2007.

The attendance will be included and available in major academic databases. The accepted papers will also be considered for publication in the special issues of the Journal Engineering Letters, the IAENG journals and in selected books of the series "Lecture Notes in Engineering and Computer Science".

The topics of the ICSC'07 include, but not limited to, the following: Numerical analysis Finite difference methods Finite element methods  
High order difference approximation Methods for integration on a surface and non-spherical mesh Monte Carlo methods  
Numerical Linear Algebra Numerical methods Factorization methods Transformation methods and applications Dynamical systems Simulation  
Keywords: scientific computing, data acquisition and data mining, fast applications of scientific computing.
