Research Note: Representing Identity and Relationships in Information Systems

 [Download Paper](#) (27Kb)

[Download Reference in BibTex Format](#)

Volume 2 / Issue 1 / Pages 47-51 - [Papers in the same Issue](#)

by Martin, M.

This research note is concerned with how identity and of relationship are represented in information systems. It presents a real world example of the problems that can arise in the delivery of social care and explores some thoughts about the application of Peirce's ideas to respond to these issues in the context of case management and record systems.

Keywords: identity, relationships, information systems
