# A model of coopetitive game and the Greek crisis

David Carfí, Daniele Schiliró

(Submitted on 17 Jun 2011 (v1), last revised 16 Sep 2011 (this version, v3))

In the present work we propose an original analytical model of coopetitive game. We try to apply this analytical model of coopetition - based on game theory and conceived at a macro level - to the Greek crisis, suggesting feasible solutions in a cooperative perspective for the divergent interests which drive the economic policies in the euro area.

Subjects: Optimization and Control (math.OC); General Finance (q-

fin.GN)

MSC classes: 91A05, 91A06, 91A10, 91A12, 91A40, 91A80
