The extensive and ongoing regulatory changes in accountancy are at the root of Larry Parker's research. He seeks to answer questions about how these sometimes difficult changes impact a variety of stakeholders and how those professionals adapt to the new environment. His work explores the organizational structure of accounting firms, as well as decision-making processes of accounting firms, corporations, and individual CPA practitioners.

Ph.D., University of Houston, 1981
M.S., University of Southern California, 1975
B.A., Rice University, 1970

Interests and Courses
