

Welcome...

FASNA was chartered as a network of certified public accounting firms in 1997 for the purpose of providing claims adjustment services to the insurance industry. Over the years, litigation support and special investigations were added as they are often interrelated with our insurance services.

Each prospective FASNA member firm is carefully screened before allowing membership in the network to verify they are quality firms in their locality and are of the highest integrity. Once selected for membership, the firm will undergo rigorous training in the unique knowledge and set of skills required to perform this work.

FASNA provides services to insurance companies, independent adjusters, law firms, and private and governmental clients. Sample listings of clients may be viewed in the [Clients](#) link.

FASNA member firms are conveniently located across the United States. Current member firms and locations may be viewed in the [Board Member Firms](#) link. FASNA continues to expand its network. Current geographic locations for which we are seeking qualified members are shown in the How to [Become a Member](#) link.
