Segmenting fa European Unic

Agric. Econ. – Czech, 59

The main objective of this characterize and segment the twenty-seven Member European Union (EU). For the techniques of cluster a cluster of cases segment t based on a sample of farm Accountancy and Informat The results show the exist types of farms in the EU th

distinguishable by their (i) characteristics, in particular Utilized Agricultural Area, by the percentage of contr the total work, (ii) by their characteristics, i.e., by the and the cash flow of the E (iii) by their guidance and of subsidies on these farm results thus suggest the d Common Agricultural Polic and adapted to the existin of countries. We suggest t
