Rajčániová

Competitiveness analysis of agricultural enterprises in Slovakia

Agric. Econ. – Czech, 50 (2004): 556-
560

Competitiveness can be analysed at various levels of the economy: at the product level, the enterprise level, the sector level, or the level of the entire economy. Several measures exist for each of these levels. This paper focuses on those used for the analysis of enterprises, particularly agricultural enterprises farming in Slovakia. Our research has been done on a selected sample of agricultural enterprises farming in Slovakia. Using "Recourse Cost Ratio" (RCR coefficient) has allowed investigating differences in competitiveness between co-operatives and business companies, between the enterprises farming in better and worse soil and natural conditions as
