# **Agric. Econ. – Czech**

**J. Jánský**

## **Prediction of the financial situation of agricultural enterprises in the Czech Republic at the EU accession**

Agric. Econ. – Czech, 50 (2004): 125-  
129

The paper deals with the financial situation of two selected agricultural enterprises in productive as well as in less favourable areas (LFA) in the present

situation – before and consecutively after the accession to the EU. 11 selected ratio indicators are used to evaluate the financial situation. There are proposed some preparatory precautions – based on the analysis of the financial situation that can be helpful for Czech farmers in gradual adaptation into the CAP conditions.
