Agric. Econ Czech

Svatošová L.: Comparison of demographic development in and the EU countries

Agric. Econ. – Czech, 56
182

Demographic development of the Czech Republic is influenced by economic and social changes. The demographic development in most EU countries, including the Czech Republic, is characterized by a change in age structure, the increase in life expectancy and the aging of the population. The

proceed with the same intensity
countries; there are differences
development, both among them
and also the regional ones in
country. The paper presents :
