Agric. Econ Czech

**Konečný V., Tl
Svobodová E.:
Classification
companies wit
the assistance
learning neural
networks**

Agric. Econ. – Czech, 56

The article is focused on r
classification of financial s
enterprises using self-lear
neural networks. This is s
where the sets of objects (c
classes are not well-knowi

would be possible to use a neural network with learning models. The advantage of a neural network is particularly the fact that the classification is not burdened by a subjective view. With reference to the high complexity, this sorting into categories can be very difficult even for experienced experts. The article also contains several examples which confirm this.
