# Agric. Econ. Czech

## Jeníček V.: World population development, transition

Agric. Econ. – Czech, 56 (2)

The accelerated population growth is a very important problem of the modern civilisation. The humankind is beginning to realise the importance of the demographic development already at the beginning of 60s. The demographic development has reached the unprecedented scope. The "population problem" became a subject of many discussions. Gradually, the population of the developing countries is

apply the natality regulation forcible methods applied in India cannot be accepted as fulfil the human approach de most important prerequisite of population stabilisation is the the families themselves. To c population considerably, it is abolish the family as the bas patriarchal structures in deve countries, to give women cor equal rights. It is important th and woman participated equ upbringing and nutrition of c Woman should have the pos decide on the number of her They should be able to make decisions regarding marriage as the way of spending money many women lack this possi are slaves of their fathers an The implementation of wome the population policy is the n important issue.

**Keywords:**

population development – E Africa, America, Asia, demog transition, demographic indic population policy, migration,
