政府绩效管理研究： 回归政治与技术双重理性本义

陈天祥

[全文pdf下载](1180KB)

摘要：

政府绩效管理是政治理性与技术理性的统一体，但目前我国学术界在该领域的研究存在明显的重技术理性而轻政治理性的倾向，主要表现在： 追求作为一种管理技术系统的自治性，热衷于以技术手段设计和开发政府绩效评估指标体系，以技术理性代替政治理性探讨政府绩效管理机制，沉湎于对技术的精细化追求。今后，政府绩效管理研究领域可从以下几个方面寻求突破： 强化政治理性研究取向，实现政治理性与技术理性的有机结合；跳出技术理性主导下研究视角的短视陷阱，立足于探讨政府绩效管理的学科“大问题”；致力于本土关照，探索融政治理性与技术理性于一体的中国特色的政府绩效管理机制；从政府再造的系统角度探讨政府绩效管理的关联问题，促进政府治理模式转型。

Reflections on the Study of Government Performance Management: Return to the Duality of Political and Technical Rationality

Chen Tianxiang

Abstract:

The government performance management is a unity of political and technical rationality, but at present, there is an obvious tendency that scholars pay attention only to technical rationality and neglect political rationality in the study of government performance management in the Chinese academic field. This can be easily demonstrated in the pursuit of self-consistency as a management technology system, in the focus on the design and development of index system of government performance measurement through technical means, in the exploration into the government performance management mechanism with technical rationality instead of political rationality, and in the indulgence in seeking technical details. In future studies of government performance management, improvements must be made as follows: to strengthen the research of political rationality, to integrate the political rationality with technical rationality and to get rid of the short-sighted trap of research perspective under the guidance of technical rationality. On the other hand, a goal must be set for the study of "big issues" in government performance management, and greater importance must be attached to the local issues and efforts must be made to explore the mechanism of government performance management with Chinese characteristics. Furthermore, the related issues of government performance management must be explored from the systematic aspect of government reinvention so as to promote the transformation of governance mode.

Keywords: government performance management political rationality technical rationality
