Welcome

Welcome

Academic Technology Services & User Support (ATSUS) helps faculty and others involved in the academic mission of the university integrate information technology and instruction through researching and consulting on new developments in IT, as well as by providing resources, support, and training to instructors throughout the university. Faculty Support Services can help you integrate instructional technology tools and practices into your courses.

Our services include: course & research web sites, Blackboard, audio-video-podcasting for instruction, online surveys and quizzes, course communication-collaboration tools, i-Clicker classroom response "polling" systems. We also provide training and individual consultations about the technology options available for your courses.

Location and Hours

Computing and Communications Center
Room 124 Garden Ave.

Open Monday-Friday
9:00AM - 5:00PM during the academic year

Closed on university holidays

- Faculty Innovation in Teaching Speaker Series: Spring 2008

Facilities and equipment

- [Visit the Academic Technology Center.](#) The new media center facility provides state-of-the-art computers, software, and other multi-media equipment for faculty and instructors to prepare course materials or to develop technology-based resources for a course. ATC equipment can convert documents, images, 35 mm slides, and audio or video materials into digital formats.
- [Computer Labs for Instruction.](#) CIT provides computer labslaptop computers and email kiosks for the Cornell community. These tools and locations allow users to access academic and research-related resources, including: computer software installed on the lab computers, network resources such as file servers and web sites, and specific hardware in selected labs.
