## Annual Report 2009-2010

The Academy's mission is 'to champion Australian scientific excellence, to promote and disseminate scientific knowledge, and to provide independent scientific advice for the benefit of Australia and the world.' From the beginning, its objectives have included the promotion of excellence in scientific research nationally and internationally; to develop and sustain a national scientific culture through science awareness and education programs; and to provide independent scientific advice to assist policy development and program delivery.

The Annual Report is available to download in PDF format as the [full report](#) or in sections as listed to the right.
