Biology of Sport is an international scientific peer reviewed journal, published quarterly in both, paper and electronic format.

Journal publishes articles concerning basic and applied sciences in sport, physical exercise, sports medicine and pharmacology, training and testing as well as in other biological and social aspects related to sport. Priority is given for interdisciplinary papers.

Biology of Sport invites the submission of high quality original research articles, short communication and review papers. Submitted manuscript should not be published elsewhere except for presentation of some preliminary data in Abstract. Detailed information on preparation of the manuscript is described in the Instruction for Authors.

Biology of Sport is abstracted/indexed in:

EMBASE/Excerpta Medica,
SPORTSDiscus (EBSCO),
IndexCopernicus,
Focus On: Sports Science & Medicine (ISI).

2010 Index Copernicus: 9.38

2009 Impact Factor: 0.051
