( ? ? ? & 0+€禦嘆◀0 When we stayed in Taiwan for an exchange program, despite the tight schedule, we visited many places, meeting old friends and make new ones. At every get-together, one important topic was how to make China powerful and prosperous in the 21st century. Though young people on the mainland and in Taiwan live in different social environments and have varied life experiences, their hearts are all imprinted with the fine tradition of the Chinese culture and they cherish the same ideal of rejuvenating the Chinese nation. ? Z ? ? ?

( ? ? ? < The turn of the century has ushered in a great epoch during which our motherland is becoming stronger and more prosperous day by day. The people on both sides of the Taiwan Straits will strengthen exchanges and work together to bring about an earlier reunification of their motherland. The precious opportunities and tremendous challenges at the turn of the century have pushed the young people to the forefront of history. What attitude should be adopted by the cross-century younger generation to meet the new century of hope? This is a question that demands our answer. ? = Z= ? ? ? Once isolated and confined to a small house on the slope of a garden, I suddenly found myself in disfavor and my wings clipped. One spring evening, with myriads of flowers in full bloom in the garden, my parents held a garden party in honor of many guests, whose arrival at once filled the place with laughing chats. In the small house on the slope, I quietly lifted the curtain, only to be met by a great and prosperous world with my elder brothers and sisters and my cousins among the guests, all in jubilation. All at once, seized by a fit of forlorn rage, I could not help bursting into tears. ? ? ? ? ? ? (?) ?

? ?? Chinese people has never thought of human being as the highest creature among everything since ancient times, whose reflection takes a quite appropriate proportion with all others in our natural world in both aspects of philosophy and arts, but not as an absolute dominant ruler. Therefore, our bitterness and depression are basically less than those of westerners, because the intensity of which is growing with the expansion of one's desire and ambition. People in the agriculture society enjoyed far less than people in the industry society, thus their wants are far less either. Besides, ancient Chinese always regard "not confined by material, not driven by material" as the major philosophy. It not means we do not have misers, but in comparison with Mauriat and Balzac's miser and aspirant, that is dwarfed. Chinese people almost characterized by moderation, peacefulness, insecural, plainess, and easier to get satisfied than westerners. ? ? Z?
