[摘要] World leaders from diverse branches of kinetic theory will gather for an intense two-day workshop at the University of Victoria in April, 2007. Ten invited speakers will deliver hour-long lectures on recent work in kinetic equations. The organizers expect that this format will attract many participants in addition to the speakers. The structure of the meeting represents a unique opportunity to hear up-to-date reports from leaders in many branches of the field at one meeting. Students especially would benefit from this opportunity. A conference in honour of the 10th anniversary of the founding of the Pacific Institute for the Mathematical Sciences.

World leaders from diverse branches of kinetic theory will gather for an intense two-day workshop at the University of Victoria in April, 2007. Ten invited speakers will deliver hour-long lectures on recent work in kinetic equations. The organizers expect that this format will attract many participants in addition to the speakers. The structure of the meeting represents a unique opportunity to hear up-to-date reports from leaders in many branches of the field at one meeting. Students especially would benefit from this opportunity. A conference in honour of the 10th anniversary of the founding of the Pacific Institute for the Mathematical Sciences. Visitors may wish to stay in Victoria for the weekend or a longer period, combine their conference experience with a spring tour of southern Vancouver Island, or visit other venues in the neighborhood.
