Lattices in hyperbolic buildings

Anne Thomas

(Submitted on 2 Apr 2012)

This survey is a brief introduction to the theory of hyperbolic buildings and their lattices, with a focus on recent results.

Comments: 10 pages. Incorporates referee's comments. To appear in Proceedings of the conference "Geometry, Topology and Dynamics in Negative Curvature", Bangalore August 2010

Subjects: **Group Theory (math.GR)**; Dynamical Systems (math.DS); Geometric Topology (math.GT)

Cite as: **arXiv:1204.0287 [math.GR]**
(or **arXiv:1204.0287v1 [math.GR]** for this version)
