Maps of metric spaces

Marius Buliga

(Submitted on 14 Jul 2011)

This is a pedagogical introduction covering maps of metric spaces, Gromov-Hausdorff distance and its "physical" meaning, and dilation structures as a convenient simplification of an exhaustive database of maps of a metric space into another. See arXiv:1103.6007 for the context.

Comments: arXiv admin note: This is the appendix of arXiv:1103.6007, separated out as a separate submission

Subjects: **Metric Geometry (math.MG)**

Cite as: arXiv:1107.2817 [math.MG] (or arXiv:1107.2817v1 [math.MG] for this version)
