摘要:

考虑了两类具有参数不确定性的时滞系统的鲁棒稳定性问题, 给出了系统具有鲁棒性能的几个充要条件. 这些结论对于研究具有时滞的反馈控制系统有重要的理论和实践价值.

关键词: 整函数; 参数不确定性; D稳定性; 圆盘多项式; 凸包

Analysis on the Robustness of Two Classes of Uncertain Systems with Time Delay

WANG Zhi-Zhen, WANG Long, YU Wen-Sheng

Abstract:

In this paper, the D stability of two classes of systems with parametric uncertainty and time delay are studied. Several necessary and sufficient conditions are given. The results are useful in theoretical and practical research of feedback control systems with time delay.

Keywords: Family of entire functions; Parametric uncertainty; D stability; Discpolynomial; Convex hull
