

## Publications in Refereed Journals

(Impact Factor, [J. Comput. Phys.](#) 2.372; [SIAM J. Sci. Comput.](#) 1.784; [Commun. Comput. Phys.](#) 1.633; [Comput. Methods Appl. Mech. Engrg.](#) 1.488; [Computers & Fluids](#) 1.431; [J. Sci. Comput.](#) 1.293; [J. Comput. Appl. Math.](#) 0.943; [Int. J. Numer. Methods Fluids](#), 0.712; [J. Comput. Math.](#) 0.667, [Sci. China Ser. A-Math](#), 0.371)

1. J. Qiu: [A class generalization large time step up-wind scheme](#), J. Jimei Univ., No. 1, (1992), (in Chinese).
2. J. Qiu: [Convergence of the second order large time step EO scheme](#), J. Jimei Univ., No. 2, (1994), (in Chinese).
3. J. Qiu: [A class of large time step TVD schemes](#), J. Jimei Univ., No. 1, (1995), (in Chinese).
4. J. Qiu and K. You: [Gauss scheme for numerical Ordinary differential equation](#), J. Jimei Univ., No. 4, (1997), (in Chinese).
5. J. Qiu and K. You: [A class of generalization Lax-Friedrichs schemes](#), J. Jimei Univ., No. 3, (1998), (in Chinese).
6. J. Qiu and J. Dai: [A class of difference schemes with staggered grids for Hamilton-Jacobi equations](#), J. Nanjing Univ. Aero. Astro., 32 (2000), 573-578, (in Chinese).
7. J. Qiu, J. Dai, N. Zhao and R. Wang: [A Class of Gauss schemes with staggered grids](#), Mathematica Applicata, 14-2 (2001), 1-5, (in Chinese).
8. J. Qiu and J. Dai: [A Class of Gauss schemes with staggered grids in two dimensions](#), Chinese J. of Comput. Phys., 18 (2001), 241-246, (in Chinese).
9. C. Wang, J. Qiu and J. Dai: [Construction and numerical simulation of high accuracy weighted ENO schemes](#), Chinese J. Comput. Phys., 18 (2001), 381-384, (in Chinese).
10. R. Wang, J. Qiu, J. Dai and N. Zhao: [A high resolution Gauss scheme with staggered grid for shallow water equation](#), Advances in Water Science, 13 (2002), 403-408, (in Chinese).
11. Z. Xu, R. Liu and J. Qiu: [Advances in weighted essentially non-oscillatory schemes for hyperbolic conservation laws](#), Advances of Mechanics, 34(2004) pp. 9-22, (in Chinese).
12. Z. Xu, J. Qiu and R. Liu: [Some optimal methods for WENO scheme in hyperbolic conservation laws](#), J. of Univ. Sci. Tech. China, 23 (2004), 29-37, (in Chinese).
13. J. Qiu and C.-W. Shu: [On the Construction, Comparison, and Local Characteristic Decomposition for High-Order Central WENO Schemes](#), J. Comput. Phys., 183 (2002) 187-209.
14. J. Qiu and C.-W. Shu: [Finite difference WENO schemes with Lax-Wendroff type time discretizations](#), SIAM J. Sci. Comput. 24 (2003) 2185-2198.
15. J. Qiu and C.-W. Shu: [Hermite WENO schemes and their application as limiters for Runge-Kutta discontinuous Galerkin method: one-dimensional case](#), J. Comput. Phys., 193 (2004) 115-135.
16. J. Qiu and C.-W. Shu: [Hermite WENO schemes and their application as limiters for Runge-Kutta discontinuous Galerkin method II: Two dimensional case](#), Computers & Fluids, 34 (2005) 642-663.
17. J. Qiu, M. Dumbser and C.-W. Shu: [The discontinuous Galerkin method with Lax-Wendroff type time discretizations](#), Comput. Methods Appl. Mech. Engrg., 194 (2005), 4528-4543.
18. J. Qiu and C.-W. Shu: [Hermite WENO schemes for Hamilton-Jacobi equations](#), J. Comput. Phys., 204(2005), 82-99.
19. J. Qiu and C.-W. Shu: [Runge-Kutta discontinuous Galerkin method using WENO limiters](#), SIAM J. Sci. Comput., 26 (2005), 907-929.
20. J. Qiu and C.-W. Shu: [A comparison of trouble cell indicators for Runge-Kutta discontinuous Galerkin method using WENO limiters](#), SIAM J. Sci. Comput., 27 (2005), 995-1013.
21. J. Qiu, B.C. Khoo and C.-W. Shu: [A numerical study for the performance of the Runge-Kutta discontinuous Galerkin method based on different numerical fluxes](#), J. Comput. Phys., 212 (2006), 540-565.
22. J. Qiu: [WENO schemes with Lax-Wendroff type time discretizations for Hamilton-Jacobi equations](#), J. Comput. Appl. Math., 200(2007), 591-605.
23. J. Qiu: [Hermite WENO Schemes with Lax-Wendroff Type Time Discretizations for Hamilton-Jacobi equations](#), J. Comp. Math., 25(2007), 131-144.
24. J. Qiu: [A Numerical comparison of the Lax-Wendroff Discontinuous Galerkin Method Based on Different Numerical Fluxes](#), J. Sci. Comput., 30(2007), 345-367.
25. J. Qiu, T. G. Liu and B. C. Khoo: [Runge-Kutta discontinuous Galerkin methods for compressible two-medium flow simulations: One-dimensional case](#), J. Comput. Phys., 222(2007), 353-373.
26. J. Qiu, T. G. Liu and B. C. Khoo: [Simulations of compressible two-medium flow by Runge-Kutta discontinuous Galerkin methods with the ghost fluid method](#), Commun. Comput. Phys., 3 (2008), 479-504.

27. J. Zhu, J. Qiu, C.-W. Shu and M. Dumbser: [Runge-Kutta discontinuous Galerkin method using WENO limiters II: Unstructured meshes](#), J. Comput. Phys., 227 (2008) 4330-4353.
28. J. Qiu: [Development and comparison of numerical fluxes for LWDG methods](#), Numerical Mathematics: Theory, Methods and Applications, 1 (2008), 435-459.
29. J. Zhu and J. Qiu: [A Class of Forth order Finite Volume Hermite Weighted Essentially Non-oscillatory Schemes](#), Science in China, Series A--Mathematics, 51 (2008), 1549-1560.
30. H. Dou, H.M. Tsai, B.C. Khoo and J. Qiu: [Simulations of detonation wave propagation in rectangular ducts using a three-dimensional WENO scheme](#), Combustion and Flame 154 (2008) 644-659
31. C. Lu, J. Qiu and R. Wang: [Weighted Essential Non-oscillatory Schemes for Tidal Bore on Unstructured Meshes](#), International Journal for Numerical Methods in Fluids, 59 (2009), 611-630.
32. J. Zhu and J. Qiu: [Hermite WENO schemes and their application as limiters for Runge-Kutta discontinuous Galerkin method III: Unstructured meshes](#), J. Sci. Comput., 39 (2009), 293-321.
33. T. Sun and J. Qiu: [LWGD method for a multi-class traffic flow model on an inhomogeneous highway](#), Adv. Appl. Math. Mech., 1 (2009), 438-450.
34. F. Gao J. Qiu and Q. Zhang: [Local Discontinuous Galerkin Finite Element Method and Error Estimates for One Class of Sobolev Equation](#), J. Sci. Comput., 41 (2009), 436-460.
35. H. Zhu and J. Qiu: [Adaptive Runge-Kutta discontinuous Galerkin methods using different indicators: One-dimensional case](#), J. Comput. Phys., 228 (2009) , 6957-6976.
36. C. Lu, J. Qiu and R. Wang: [A numerical study for the performance of the WENO schemes based on different numerical fluxes for the shallow water equations](#), J. Comp. Math., 28 (2010), 807-825.
37. J. Zhu and J. Qiu: [Trigonometric WENO schemes for hyperbolic conservation laws and highly oscillatory problems](#), Commun.Comput. Phys., 8 (2010), 1242-1263.
38. G. Li and J. Qiu: [Hybrid weighted essentially non-oscillatory schemes with different indicators](#), J. Comput. Phys., 229 (2010) 8105-8129.
39. J. Zhu and J. Qiu: [Local DG method using WENO type limiters for convection-diffusion problems](#), J. Comput. Phys., 230 (2011), 4353-4375.
40. W. Guo, F. Li and J. Qiu: [Local-structure-preserving discontinuous Galerkin methods with Lax-Wendroff type time discretizations for Hamilton-Jacobi equations](#), J. Sci. Comput., 47 (2011), 239-257.
41. C. Lu and J. Qiu: [Simulations of shallow water equations with Finite Difference Lax-Wendroff Weighted Essential Non-oscillatory Schemes](#), J. Sci. Comput., 47 (2011), 281-302.
42. J. Zhu, J. Qiu, T. G. Liu and B. C. Khoo: [RKDG methods with WENO type limiters and conservative interfacial procedure for one-dimensional compressible multi-medium flow simulations](#) Appl. Numer. Math., 61(2011), 554-580.
43. R. Abgrall and J. Qiu: [Preface to the special issue "High order methods for CFD problems"](#), J. Comput. Phys., 230 (2011), 4101-4102.
44. J. Zhu and J. Qiu: [Runge-Kutta discontinuous Galerkin method using WENO type limiters: Three dimensional unstructured meshes](#), Commun.Comput. Phys., 11 (2012), 985-1005.
45. G. Li, C. Lu and J. Qiu: [Hybrid well-balanced WENO schemes with different indicators for shallow water equations](#), J. Sci. Comput., 51 (2012), 527-559.
46. C.-S. Huang, T. Arbogast and J. Qiu: [An Eulerian-Lagrangian WENO finite volume scheme for advection problems](#), J. Comput. Phys., 231(2012), 4028-4052.
47. J. Zhu, T. G. Liu, J. Qiu and B. C. Khoo: [RKDG methods with WENO limiters for unsteady cavitating flow](#), Computers & Fluids, 57(2012), 52-65.
48. X. Yang, W. Huang and J. Qiu: [A moving mesh WENO method for one-dimensional conservation laws](#), SIAM J. Sci. Comput., 34 (2012), A2317-A2343.
49. J. Zhu and J. Qiu: [WENO schemes and their application as limiters for RKDG methods based on trigonometric approximation spaces](#), J. Sci. Comput., 55 (2013), 606-644.
50. H. Yang, F. Li and J. Qiu: [Dispersion and dissipation errors of two fully discrete discontinuous Galerkin methods](#), J. Sci. Comput., 55(2013), 552-574.
51. H. Zhu and J. Qiu: [An h-adaptive RKDG method with troubled-cell indicator for two-dimensional hyperbolic conservation laws](#), Adv. Comput. Math., 39(2013), 445-463.
52. Y. Cheng, F. Li, J. Qiu and L. Xu: [Positivity-preserving DG and central DG methods for ideal MHD equations](#), J. Comput. Phys., 238 (2013), 255-280.
53. H. Zhu, Y. Cheng and J. Qiu: [A comparison of the performance of limiters for Runge-Kutta discontinuous Galerkin methods](#), Adv. Appl. Math. Mech., 5 (2013), 365-390.
54. H. Zhu and J. Qiu: [An h-adaptive Runge-Kutta discontinuous Galerkin method for Hamilton-Jacobi equations](#), Numer.

Math.: Theory, Methods Appl., to appear.

55. J. Zhu, X. Zhong, C.-W. Shu and J. Qiu: [Runge-Kutta discontinuous Galerkin method using a new type of WENO limiters on unstructured mesh](#), J. Comput. Phys., 248 (2013), 200-220.
56. J. Zhu and J. Qiu: [Hermite WENO schemes for Hamilton-Jacobi equations on unstructured meshes](#), J. Comput. Phys., 254 (2013), 76-92.
57. J. Liu, J. Qiu, O.Hu, N. Zhao, M. Goman and X. Li: [Adaptive Runge-Kutta discontinuous Galerkin method for complex geometry problems on Cartesian grid](#), Inter. J. Numer. Methods Fluids, to appear.
58. G. Li and J. Qiu: [Hybrid WENO schemes with different indicators on curvilinear grid](#), Adv. Comput. Math., to appear
59. J. Zhu and J. Qiu: [Finite volume Hermite WENO schemes for solving the Hamilton-Jacobi equation](#), Commun.Comput. Phys., to appear.
60. C. Lu, W. Huang and J. Qiu: [Maximum principle in linear nite element approximations of anisotropic diffusion-convection-reaction problems](#), Numerische Mathematik, to appear.

---

## Publications in Conference Proceedings and books

- J. Qiu: *Weighted Non-Oscillatory Limiters for Runge-Kutta Discontinuous Galerkin Methods*, ADAPTIVE HIGH-ORDER METHODS IN COMPUTATIONAL FLUID DYNAMICS, edited by Z J Wang, World Scientific, 2011.
- J. Qiu and J. Zhu: *RKDG with WENO type limiter*, ADIGMA - A European Initiative on the Development of Adaptive Higher-Order Variational Methods for Aerospace Applications, Notes on Numerical Fluid Mechanics and Multidisciplinary Design, Volume 113, Springer, 2010
- J. Qiu and C.-W. Shu, *RKDG methods with WENO type limiter for conservation laws*, Proc. of the Sixth World Congress on Computational Mechanics, pp. 203. 2004, Beijing, P.R. China. @2004 Tsinghua University Press & Springer-Verlag.
- J. Qiu, Ning Zhao, Jiazun Dai and Ruyun Wang, *A class of large time-step MUSCL schemes*, Proc. of the 4th Asian Computational Fluid Dynamics Conference, pp. 536-540, 2000, Sichuan, P.R. China.
- J. Dai and J. Qiu, *Numerical methods for differential equations*, Southeastern University Press, 2002.
