

The C^* -algebra of an affine map on the 3-torus

[Kasper K. S. Andersen](#), [Klaus Thomsen](#)

(Submitted on 1 Apr 2012)

We study the C^* -algebra of an affine map on a compact abelian group and give necessary and sufficient conditions for strong transitivity when the group is a torus. The structure of the C^* -algebra is completely determined for all strongly transitive affine maps on a torus of dimension one, two or three.
