关于增生算子方程解的带误差的Ishikawa迭代程序

上海师范大学数学系

摘要:

该文在 Banach空间中证明了, 带误差的Ishikawa迭代序列强收敛到Lipschitz连续的增生算子方程的唯一解. 而且, 也给Ishikawa迭代序列提供了一般的收敛率估计. 利用该结果还推得, 带误差的Ishikawa迭代序列也强收敛到Lipschitz 连续的强增生算子方程的唯一解.

Ishikawa Iteration Process with Errors for Solutions to Equations Involving Accretive Operators

Abstract:

It is shown that the Ishikawa iterative sequence with errors converges strongly to the unique solution of the equation involving the Lipschitz continuous accretive operator in a Banach space. Moreover, our result provides a general convergence rate estimate for the Ishikawa iterative sequence. From this result, it follows that the Ishikawa iterative sequence with errors alsoconverges strongly to the unique solution of the equation of the Lipschitz continuous strongly accretive operator.

Keywords: Arbitrary real Banach space Accretive operator Ishikawa iterative sequence with errors Convergence rate estimate.
