Publications of 2002:

Monographs and printed lecture notes :

1. De-hao Yu, The Natural Boundary Integral Method and Its Applications, Kluwer Academic Publisher/Science Press, Beijing, New York, Dordrecht, Boston, London, Vol.539, 2002

Papers published in research journals :

1. Alonso, Ana Isabel, Jialin Hong, Ergodic type solutions of differential equations with piecewise constant arguments. Int. J. Math. Math. 28(2001). No. 10. 609-619.

2. Zhong-Zhi Bai, Wang Chuanlong, On the convergence of nonstationary multisplitting two-stage iteration methods for hermitian positive definite linear systems, Journal of Computational and Applied Mathematics,138:2(2002), 287-296.

3. Zhong-Zhi Bai, Qiu Shouxia, Splitting-MINRES methods for linear systems with the coefficient matrix with a dominant indefinite symmetric part, Mathematica Numerica Sinica, 24:1(2002), 113-128.(In Chinese)

4. Zhong-Zhi Bai, D.J. Evans, Matrix multisplitting methods with applications to linear complementarity problems: Parallel asynchronous methods, International Journal of Computer Mathematics, 79:2(2002), 205-232.

5. Zhong-Zhi Bai, Huang Yuguang, Relaxed asynchronous iterations for the linear complementarity problem, Journal of Computational Mathematics, 20:1(2002), 97-112.

6. Zhong-Zhi Bai, Zhang Shaoliang, A regularized conjugate gradient method for symmetric positive definite system of linear equations, Journal of Computational Mathematics, 20:4 (2002),437-448.

7. Zhong-Zhi Bai, Experimental study of the asynchronous multisplitting relaxation methods for the linear complementarity problems, Journal of Computational Mathematics, 20:6(2002).

8. Li-Qun Cao,J.Z.Cui£¬D.C.Zhu, Multiscale asymptotic analysis and numerical simulation for the second order Helmholtz equations with rapidly oscillating coefficients over general domains, to appear in SIAM J. Numer.Anal., 2002.

9. Li-Qun Cao, J.Z.Cui, AND DE-CHAO ZHU, Multiscale Asymptotic Analysis and Numerical Simulation for the Second Order Helmholtz Equations with Rapidly Oscillating Coefficients over General Convex Domains, SIAM J. Numer. Anal. Vol.0,

10. J.B. Chen, M.Z. Qin, Yi-Fa Tang, Symplectic and Multi-Symplectic Methods for the Nonlinear Schroedinger Equation, Computers Math. Applic., 43(8/9), 1095-1106(2002).

11. J.B. Chen, Yi-Fa Tang,A.G. Xiao, Is the Formal Energy of the Mid-Point Rule Convergent Computers Math. Applic., 2002, 43(8/9), 1171-1181.

12. Zhongying Chen, Ronghua Li, Aihui Zhou, A Note on the Optimal L2-Estimate of the Finite Volume Element Method. Adv. Comp. Math.,(2002)16, 291-303.

13. Z. Chen and S. Dai: On the efficiency of adaptive finite element methods for elliptic problems with discontinuous coefficients, SIAM J. Sci. Comput. 24 (2002), 443-462.

14. Zhiming Chen, On the efficiency of adaptive finite element methods for elliptic problems with discontinuous coefficients, SIAM J. Sci. Comput. 24 (2002), 443-462.

15. Zhiming Chen, A mixed multiscale finite element method for elliptic problems with oscillating coefficients, with T. Hou, Math. Comp. 72 (2002), 541-576.

16. Y.H.Dai,L.Z. Liao, R-Linear Convergence of the Barzilai and Borwein Gradient Method,IMA Journal of Numerical Analysis, (2002) 22, 1-10.

17. Y.H.Dai£¬On the Nonmonotone Line Search,Journal of Optimization Theory and Applications, (2002), 112 (2), 315-330.

18. Y.H.Dai, J.Y. Yuan, and Y. Yuan£¬ Modified Two-point Stepsize Gradient Methods for Unconstrained Optimization, Computational Optimization and Applications, 22 (2002), 103-109.

19. Y.H.Dai, A Nonmonotone Conjugate Gradient Algorithm for Unconstrained Optimization, Journal of Systems Science and Complexity, (2002) 15(2), 139-145.

20. Y.H.Dai, Conjugate Gradient Methods with Armijo-type Line Searches, Acta Mathematicae Applicatae Sinica, English Series,,18(1) (2002), 123-130.

21. Qiang Du, J. Remski, Limiting models for Josephson junctions and superconducting weak links, J. Math Anal Appl, 266(2002), 357-382.

22. Qiang Du, M. Gunzburger and L., Ju, Meshfree, Probabilistic Determination of Points, Sets and Support Regions for Meshless Computing, Computer Methods in Applied Mechanics and Engineering, 191(2002), 1349-1366.

23. Jialin Hong, Qin Meng-Zhao, Multi-symplecticity of centred box discretization for Hamiltonian PDEs with m2 space dimension, Applied Mathematics Letters,15(2002), 1005-1011.

24. Weimin Han, Lie-Heng Wang£¬Nonconforming Finite Element Analysis for a Plate Contact Problem, Siam J. Numer Anal,2002, Vol.40, No.5,1683-1697.

25. Qi-Ya Hu and Jun Zou, An iterative method with variable relaxation parameters for saddle-point problems, SIAM J. Matrix Anal. & App., 2002, Vol.23, No.2,317-338.

26. Qi-Ya Hu, De-hao Yu,A Preconditioner for Coupling System of Natural Boundary Element and Composite Grid Finite Element,Journal of Computational Mathomatics,Vol.20,No.2,2002,165-174.

27. Qi-Ya Hu£¬Guoping Liang, Acceleration of the non-symmetrized two-level iteration, Appl. Numer. Math., 41(2002), 305-323.

28. Qi-Ya Hu,A Preconditioner for Domain Decomposition Methods With Mortar Lagrange Multipliers, Journal of Systems Science and Complexity, Vol.15,No.4,384-395.

29. Qi-Ya Hu,Jun Zou,Two New Variants of Nonlinear Inexact Uzawa Algorithms for Saddle-Point Problems, Numer.Math.(2002)93,333-359.

30. Xing-Biao Hu, Johan Springael, A Backlund Transformation and nonlinear superposition formula for the Lotka-Volterra hierarchy, ANZIAM Journal, 44£¨2002£©, 121-128.

31. Xing-Biao Hu, P. A.Clarkson, Rational Solutions of an Extended Lotka-Volterra Equation, Journal of Nonlinear Mathematical Physics, 9(2002), suppl.1,75-86.

32. Xing-Biao Hu, Wen-Xiu Ma, Application of Hirota¡¯s bilinear formalism to the Toeplitz lattice-some special soliton-like solutions, Physics Letters A, 293(2002),161-165.

33. Hon-Wah Tam,Xing-Biao Hu,Soliton solutions and Backlund transformations for the Kupershmidt five-field lattice: a bilinear approach, Applied Mathematics Letters, 15(2002) (8), , 987-993.

34. Hon-Wah Tam, Xing-Biao Hu, Xian-Min Qian, Remarks on several 2+1 dimensional lattices, Journal of Mathematical Physics, 2002, 43(2), 1018-1028.

35. Claire R. Gilson, Xing-Biao Hu, Stephen Barnett, On multiple soliton solutions of some simple differential-difference equations, Inverse Problems, 2002, 18(6),1499-1508.

36. C.Y.Ho,Li Yuan, M.-C.Chu, and P.T.Leung, Ionization and photon emission in single-bubble sonoluminescence, Europhys. Lett.£¬56(6), 891-897(2001).

37. C.Y.Ho, Li Yuan and M.-C.Chu, P.T.Leung and W.Wei, Effects of ionization in single-bubble sonoluminescence, Physical Rev.E.Vol. 65, No. 041201, (2002). 1-12.

38. Li Yuan, Comparison of implicit multigrid scheme for three-dimensional incompressible flows, Journal of Computational Physics, 177 (2002), 1-22.
