

The BIOMAT 2016 International Symposium will be held in the Chern Institute of Mathematics, Nankai University, Tianjin, People's Republic of China. The participation in the BIOMAT 2016 International Symposium is another great opportunity for research students and young Post Docs to exchange scientific feedback with their colleagues from Asia, in the best tradition of the BIOMAT Symposium Series.

The present conference will be the 16th edition of a series of symposia organized by the BIOMAT Consortium, a non-profit organization of scientists from universities and research centres from many countries on five continents. The BIOMAT Consortium was founded in 2001, during the activities of the First BIOMAT Symposium in Rio de Janeiro, Brazil. Its fundamental mission is to promote the scientific exchange of knowledge in the interdisciplinary areas of Mathematical and Biological Sciences as well as the enhancement of multidisciplinary scientific work on developing countries worldwide. The works selected by the BIOMAT Referee Board and senior AdHoc referees, on abstract and full paper form have an acceptance level of 20%. The BIOMAT series of books is indexed by ISI - Web of Science - Scientific Proceedings Citation Index; MathSciNet; Zentralblatt für Mathematik, etc.. The series is published by World Scientific Co. Pte. Ltd. with DOI number links for the Book Front and Back Matters. Accepted papers are published as chapters of these books and they also have exclusive DOI number links.
