Research Statement:
I like working on applied and theoretical problems at the same time and one thing nice about statistics is that you can be useful in a wide variety of areas. So my current applications include biostatistics and also astrophysical applications. The surprising thing is that the methods used are similar in both areas. I recently gave a talk at Penn State called "Astrophysics and Biostatistics: The Odd Couple" that made this point.

Dissertation

Dissertation Title:
Problems in Probability of a Geometric Nature

Advisor Name:
Miller

Committee Names:
Miller, Solomon

Cohort:
1963-1964
