### 2-7 August 2009 Beijing Normal University , Beijing , China

The annual international conference on non-perturbative /background independent quantum gravity will take place from 2 to 7 August 2009 at Beijing Normal University in China. It stands in the tradition of Loops '04 in Marseille, Loops '05 in Potsdam and Loops '07 in Morelia, but is more concentrated on the issues and approaches closely related to loop quantum gravity. The main topics include:

- \* Loop quantum gravity
- \* Loop quantum cosmology and other symmetric models
- \* Spin foams and their low energy ramifications
- \* Fundamental questions of quantum gravity
- \* Black holes and Cosmology related to quantum gravity
- \* Phenomenology of quantum gravity.
