

Diagrammatic approach to coherent backscattering of laser light by cold atoms: Double scattering revisited

Vyacheslav Shatokhin, Thomas Wellens, Andreas Buchleitner

(Submitted on 6 Apr 2012 (v1), last revised 22 Dec 2012 (this version, v2))

We present a diagrammatic derivation of the coherent backscattering spectrum from two two-level atoms using the pump-probe approach, wherein the multiple scattering signal is deduced from single-atom responses, and provide a physical interpretation of the single-atom building blocks.
