

Nuclear Theory

Examination of the Gunion-Bertsch formula for soft gluon radiation

Trambak Bhattacharyya, Surasree Mazumder, Santosh K Das, Jan-e Alam

(Submitted on 3 Jun 2011 (v1), last revised 23 Feb 2012 (this version, v3))

The spectrum of emitted gluons from the process $g+g \rightarrow g+g+g$ has been evaluated by relaxing some of the approximations used in earlier works. The difference in the results from earlier calculations have been pointed out. The formula obtained in the present work has been applied to estimate physical quantities like equilibration rate of gluons and the energy loss of fast gluon in the gluonic plasma.

Comments: One LaTeX file for the text and three eps files for figures
