Preparation Timeline

The U.S. particle physics community is proud to host the 38th ICHEP in Chicago from the 3rd to the 10th August 2016. ICHEP is a focal point of the field of particle physics, bringing together experimentalists and theorists of the world. It was first held in 1950, and is biennial since 1960.

At ICHEP physicists from around the world gather to share the latest advancements in particle physics, astrophysics/cosmology, and accelerator science and to discuss plans for major future facilities. ICHEP 2016 will feature plenary rapporteur talks covering topics that span the full spectrum of research within the field. Parallel sessions and a poster session will provide an opportunity for younger scientists to present their work.

We look forward to seeing you at the ICHEP 2016 in Chicago.

Young-Kee Kim

on behalf of the ICHEP 2016 Organizing Committee

THANK YOU FOR ATTENDING! HOPE TO SEE YOU IN SEOUL IN 2018!
