assumption: putting Free Will at work

[Charles Tresser](#)

*(Submitted on 6
Oct 2010)*

We
prove a
version
of the
Bell's

Theorem
that
does not
assume
Locality
but only
the
Effect
After
Cause
Principle
(EACP)
according
to which
for any
Lorentz
observer
the
value of
an
observable
cannot
change
because
of an
event
that
happens
after the
observable
is
