摘要：利用毛细管气相色谱法测定室内空气中的总挥发性有机化合物（TVOC）。实验表明，该方法能较快速、简便、准确地测定室内空气中的TVOC，改进现有的国家标准GB50325 2001的检测方法，使之更加适应室内空气监测的需要。

[Determination of TVOC of indoor air by capillary column GC](#)

Abstract: Simultaneous determination of total volatile organic compounds (TVOC) in indoor air was carried out by capillary column GC. The results showed that this method could rapidly determine TVOC. In this article, an improved method of current national standard GB50325 2001 was used to make it more simple, fast, and accurate in monitoring TVOC of indoor air.
