Department of Geosciences  
 Idaho State University  
 921 S. 8th Ave., S 8072  
 Pocatello ID 83209-8072  
 (Phone) 208-282-3235  
 (Fax) 208-282-4414

The Department of Geosciences at Idaho State University is a community of scholars who are fascinated with the earth and committed to its rigorous scientific investigation. Learning and research are facilitated within the informal atmosphere of the department, where faculty and students work as colleagues to solve modern geologic problems. Graduate thesis projects usually include equal amounts of fieldwork and laboratory analysis, taking advantage of the natural setting of Idaho as well as excellent geochemical lab, digital mapping lab, and other research facilities.
