Space weather science is advancing towards a new stage of rapid development. As a newly emerging discipline, it is essentially playing its role in human society's survival and development. Advances in the field of space weather are booster of the development of economic society and accelerator of science and technology.

The 4th international space weather conference will bring together scientists covering all disciplines of space weather, including solar physics, heliospheric physics, solar-terrestrial physics, magnetospheric physics, ionospheric physics, atmospheric physics, space weather modeling and application, and ground- & space-based exploration. The 4th international space weather conference aims to provide a forum where scientists, especially early career researchers, can present their work and discuss their ideas with experts in all fields of space weather. We are looking forward to cordially welcoming you in Beijing.

The Organizing Committee of

The Fourth International Space Weather Conference

18 November 2016

Deadline for Registration and Abstraction: July 15
