摘要:

为了求出地质统计学中变差函数理论模型的参数,首先把相应模型化成线性函数的形式,多面手应用线性方程组非负解的理论计算出它的参数。

Abstract:

In this paper, a new method for calculating parameters of the theoretical variogram model in geostatistics is established. The studied model is transformed to a linear function, and then its parameters are calculated by using the theory of nonnegative solution of the linear equation set.

Keywords: [linear equation set](#) [nonnegative solution](#) [variogram](#) [Taylor expansion](#) [linear function](#)
