IMA-Europe

Welcome at the European Industrial Minerals Association!

Industrial minerals are essential raw materials and form an integral part of our modern life: a family house contains up to 150 tonnes of minerals, a car up to 250 kg. Minerals make up 50% of paint and up to 50% of paper, whereas ceramics and glass are 100% made out of minerals.

To know more about the missions, membership and history of IMA-Europe, click [HERE](#).

LATEST NEWS - IMA-Europe's comments to UNECE - [read more](#)

PRESS RELEASE : Daniel J. Reuss elected as the new IMA-Europe President

IMA-Europe issued a [Sustainability brochure](#) "Industrial Minerals : Together for a Sustainable Future" which explains resource efficiency in the Industrial Minerals sector.

Industrial Minerals can be and are – recycled! Discover the recycling sheets [here](#).

PRESS RELEASE - IMA-Europe 2012 Conference on Resource Efficiency (14 November)
