About CCA Europe

The European calcium carbonate and dolomite producers established their own representation at EU level through CCA-Europe, a founding member of the Industrial Minerals Association Europe (IMA-Europe).

CCA-Europe is a non-profit association, whose Members cooperate on scientific and legislative issues of common interest related to the mineral calcium carbonate.

Key aspects are those related to the environment, economic and social conditions, notably with regard to health and safety, the improvement and standardisation of labour and occupational health conditions.

Its membership comprises 48 companies (27 direct membership and 21 through national associations) from 11 EU Member States as well as Norway and Switzerland, [click here to view members list](#).

As a member of IMA Europe, the members benefit from a wide representation and strong voice at EU level and a synergy of issues common to the industrial minerals sector as a whole.
