### **AIMS OF THE AUSTRALIAN CLAY MINERALS SOCIETY**

The ACMS is a scientific society whose aim is to further the study of clay minerals and allied substances:-

- by facilitating the exchange of information among members of the Society, and, in general, all those interested in clay minerals;
- by providing facilities for reading and discussion of papers on the methods and results of research on clay minerals and allied topics;
- by stimulating interest in clay mineralogy; and,
- by encouraging the practical applications of clay mineral research.

### **How to join the ACMS**

All those having an interest in the aims of the Society are eligible to become members.

All who attend a Biennial Conference of the Society become members for the next four years.

Alternatively, you can join the Society by contacting the Secretary, explaining your interest, and paying \$1 per year.

**Celebrating 50 years**

2012 marks the 50<sup>th</sup> year of the ACMS

## **Australian Regolith Geoscientists Association.**

### **OBJECTIVES OF THE AUSTRALIAN REGOLITH GEOSCIENTISTS ASSOCIATION**

The objectives of ARGA are to further the study of regolith geoscience and allied disciplines by:

- a. Facilitating the exchange of information among members of the association, and, in general, all those interested in regolith science;
- b. Stimulating interest in regolith geoscience;
- c. Encouraging the practical applications of regolith geoscience research.

#### **How to join the ARGA**

All those having an interest in the objectives of the Association are eligible to become members. All who attend a Biennial Conference of the Association become members for the next four years. Alternatively, you can join the Society by contacting the Secretary, explaining your interest, and paying \$1 per year.

#### **ARGA Committee**
