VI Brazilian Symposium of Rock Mechanics

Every 4 years the Brazilian Rock Mechanics Committee organizes the Brazilian Symposium of Rock Mechanics (SBMR). This event represents the most important national gathering for discussing and presenting scientific research and technology, geotechnical design and engineering works related to rock mechanics. This 2014 version, VI SBMR, will be held in the city of Goiania, 09-13 September, in parallel to the Brazilian Congress of Soil Mechanics and Geotechnical Engineering, XVI COBRAMSEG.

The VI SBMR is promoted by the ISRM - International Society for Rock Mechanics and was granted the Specialized Conference. The event is co-sponsored by the ARMA - American Rock Mechanics Association. The CSRME - Chinese Society for Rock Mechanics and Engineering, will participate officially in the event and a Keynote Lecture will be given Chinese representative.

The aim of the event is to congregate professional who use rock mechanics in their daily activities related to engineering and geology. The technical program will focus on civil engineering, mining and petroleum applications that integrate state of the art design methods, rock testing and monitoring for natural resource and infrastructure development.

Join us in Goiania and share your knowledge with the Brazilian rock mechanics community.

Important Dates

30/08/2013 » Abstract submission open

02/12/2013 » Deadline for abstract submission.
EXTENDED!

15/12/2013 » Notice of acceptance of abstracts to the authors

03/01/2014 » Registration open

14/03/2014 » Full article submission

31/03/2013 » Early Bird registration closed

16/05/2014 » Notice of review of full article to authors

06/06/2014 » Deadline for submitting reviewed full article

27/06/2014 » Final notice of acceptance of full article

30/06/2014 » End of registration with reduced fee

12/07/2014 » Notice of technical program to authors

28/08/2014 » On-line registration closed
