摘要:

1992年李庆年、赵凤江在沂沭断裂带内建立了大盛群, 其中包括同时命名的马朗沟组、田家楼组、寺前村组, 时代定为早白垩世。在考察中笔者肯定了这项成果, 同时根据笔者的认识进行了调整和修订, 将马朗沟组易名, 沿用莱阳—诸城地区的陡山组; 新建小黑沟组; 修订了原“田家楼组”的涵义; 废除大盛群, 将这3个组归入青山群; 取消寺前村组, 沿用莱阳—诸城地区的辛格庄组, 归入王氏群。

Fund Project:

Abstract:

The Dasheng Group includes the Malanggou, Tianjialou and Siqiancun formations within the Yi-shu fault zone in Shandong province. It was established by Li Qingping and Zhao Fengjiang in 1992. Its age is considered to be Early Cretaceous based on recent researches some changes have been proposed as follows: the Malanggou Formation is renamed and replaced by the Doushan Formation in the Laiyang-Zhucheng region; the Xiaohai Formation is established; the connotation of the original Tianjialou Formation revised; the Doushan Formation, Xiaohai Formation and Tianjialou Formation are incorporated into the Qingshan Group; the Xingezhuang Formation in the Laiyang-Zhucheng region is used to replace the Siqiancun Formation and is incorporated into the Wangshi Group.
