Event Overview

This workshop targets operational petroleum geochemistry in carbonate reservoirs. The goal is to provide a perspective on how established and emerging geochemical tools can help to have a comprehensive understanding of the life of these hydrocarbon fields.

Important Dates

Registration Opens	01 June 2016
Outcome of Technical Programme	01 June 2016
Early Registration Deadline	14 August 2016
Late Registration Deadline	16 September 2016

Platinum Sponsor

EAGE thanks Total for their generous contribution as Platinum Sponsor for this workshop.

Keynote Presenter: Prof. Dr Brian Horsfield

We are pleased to announce that Prof. Dr Brian Horsfield will give his Keynote Presentation titled, "Evaluating and Predicting Reservoir Fluid Compositions and Physical Properties using Polar compound Geochemistry" on Tuesday 4th October.

Keynote Presenter: Dr. Yongchun Tang

Dr. Yongchun Tang has confirmed his participation in the Workshop Programme, he will give his Keynote Presentation titled, "Recent Advances of Gas Isotope Geochemistry for Exploration, Production and Operations" on Wednesday 5 October 2016.
