About SNBM2009

Symposium of Nuclear Magnetic Resonance for Biological Macromolecules, 2009

June 25th ~ June 29th, 2009

Hefei, Anhui, P. R. China

"Symposium of Nuclear Magnetic Resonance for Biological Macromolecules, 2009" will be held from June 25th to June 29th, 2009 in the city of Hefei, Anhui, P. R. China, organized by University of Science and Technology of China. The symposium will focus on nuclear magnetic resonance studies of biological macromolecules, including new method developments and latest applications in all areas of macromolecules. Topics of the symposium includes three dimensional structure determination and dynamics studies of water soluble protein complexes, nucleic acids and membrane proteins; drug screening and candidate optimization, metabonomics analysis using solution and solid state nuclear magnetic resonance methods.

We are looking forward to your participation in this exciting symposium.
