中国毒理学会专业委员会换届选举表格

9th Congress of Toxicology in Developing Countries (CTDC9) and XIX Congresso Brasileiro de Toxicologia (XIXCBTox)

See the newly published CTDC9 website for additional information!

On behalf of the Brazilian Society of Toxicology (SBTox) and the International Union of Toxicology (IUTOX), it is my pleasure to invite you to attend the 9th Congress of Toxicology in Developing Countries, and the XIX Congress of Toxicology, to be held November 7-10, 2015 in Natal, Rio Grande do Norte, Brazil.

Held every three years, CTDC is sponsored by IUTOX and organized by Member Societies. Its first version (at the time not an IUTOX official meeting) was organized in Argentina by Dr. José Alberto Castro with the aim to provide a forum for discussing toxicological problems facing developing countries and exchanging knowledge with toxicologists from all over the world, especially from developing countries and regions. Other CTDCs were then organized worldwide in developing countries in Asia, South Africa, and Europe.

This is a unique opportunity in our country and continent to update knowledge in the field of toxicology and related sciences with emphasis in developing countries issues and to share work with national and international toxicologists. This will also be an opportunity for attendees to network with potential collaborators and mentors, both national and international, and to discuss recent scientific results.

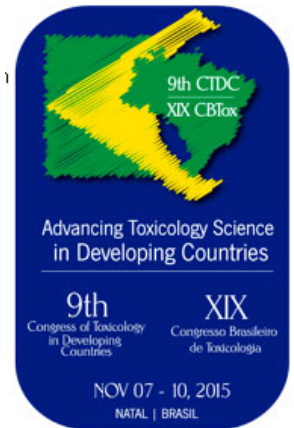

We are organizing a broad program which covers the most relevant areas of toxicology to developing countries and the Latin America region. Some topics already approved by the Scientific Committee include nanotoxicology, mode action and risk assessment, forensic toxicology, developmental toxicology, in vitro toxicology and alternatives to animal experimentation, and genotoxicology, among others.

The Congress is organized in symposia, workshops, exhibitor-hosted sessions, and poster and oral presentations from Sunday to Tuesday. Take time to stop by the exhibition hall designed as a comprehensive marketplace for product information and cutting-edge technology.

Continuing education courses will be organized on Saturday, providing an opportunity for undergraduate and graduate students to improve their knowledge in specific areas.

Considering that this will be an international meeting, the idiom will be English for the symposia and workshops as well as oral and poster presentations. Some continuing education courses will be taught in Portuguese.

With your energy and enthusiasm, we will make this event a meeting to remember.
