Chemically and biologically-related topics regularly make the news including the human genome project, Green chemistry subject, global climate change, pollution, environmental concerns, species diversity, genetics and rapid advances in medicine and biotechnology. As human understanding of the self and the surrounding world has expanded, we have begun to understand the importance of all the organisms that share the world in which we live.

The chemical sciences are at the heart of the solution to today's global problems. It covers all the branches of Chemistry including Biochemistry, Agricultural & Soil Chemistry, Analytical Chemistry, Polymer Chemistry, Biochemistry etc.
