

... (The page contains a dense grid of small text, likely a dictionary or reference list, with many characters and symbols.) ...

Abstracts of the 11th International Congress of Nephrology, 1998, Beijing, China. The document contains a dense list of scientific abstracts, organized by session and topic. Key areas include: 1. Nephrology: Abstracts on renal function, dialysis, and kidney disease. 2. Hematology: Abstracts on blood disorders and transfusion. 3. Immunology: Abstracts on immune system responses. 4. Molecular Biology: Abstracts on genetic and cellular mechanisms. 5. Clinical Medicine: Abstracts on patient care and medical treatments. The text is highly technical and includes numerous references and data points. The layout is a standard academic format with a header, a list of abstracts, and a footer with contact information.
