GENETICS AND CLASS STRUGGLE PAGES FROM THE HISTORY OF GENET \pm CS

Chu Tian

Abstract

This paper deals with some problems in the history of genetics, namely, the interrelation between genetics and the evolutionary theory, genetics and eugenits, and genetics and philosophy. These problems reflect some aspects of class struggle in the society. Therefore it is important for the interests of revolutionary proletariat to have: \(\) keen insight into the relation of genetics to classstruggle. The author presents his views on several instances in the history of genetics, having some bearing on this problem. It is hoped that the discussion will be continued by the broad masses of readers, armed with the ideological weapon of Marxism—Leninism and MaoTse—tung Thought. All bourgeois and revisionist viewpoints should be criticized.
