Welcome to the Society of Environmental Toxicology and Chemistry (SETAC)

SETAC is a not-for-profit, global professional organization comprised of some 5,500 individual members and institutions from academia, business and government. Since 1979, the Society has provided a forum where scientists, managers and other professionals exchange information and ideas on the study, analysis and solution of environmental problems, the management and regulation of natural resources, research and development, and environmental education.

SETAC's founding principles are:

- Multidisciplinary approaches to solving environmental problems
- Tripartite balance among academia, business and government
- Science-based objectivity

SETAC is implementing this mission [worldwide](#).
