## News From the Field

IUPUI researchers use computers to 'see' neurons to better understand brain function

**March 6, 2014**

A study at the Department of Computer and Information Science in the School of Science at Indiana University-Purdue University Indianapolis (IUPUI) reveals new information about the motor circuits of the brain that may one day help those developing therapies to treat conditions such as stroke, schizophrenia, spinal cord injury or Alzheimer's disease. [Full Story](#)

### Source

Indiana University-Purdue University Indianapolis School of Science

*The National Science Foundation (NSF) is an independent federal agency that supports fundamental research and education across all fields of science and engineering. In fiscal year (FY) 2014, its budget is \$7.2 billion. NSF funds reach all 50 states through grants to nearly 2,000 college universities and other institutions. Each year, NSF receives about 50,000 competitive requests for funding, and makes about 11,500 new funding awards. NSF also awards about \$593 million in professional and service contracts yearly.*
